Dynamic 360

Dynamic LANGUAGES

SCHOOLS, COLLEGES & UNIVERSITIES

TRAVEL THE WORLD, EXPLORE CULTURES & LEARN LANGUAGES

360° TRIPS, CONVERSATIONS AND LESSONS ON META QUEST HEADSETS OR ON THE WEB

SAME LIBRARY, MULTIPLE WAYS IN

Immersive software for classrooms

Updated November 2026 | Free demo • Paid pilot • Flexible licences

THREE KINDS OF EXPERIENCE, ONE LIBRARY

Dynamic Languages is filmed on location in 360°. Students look around a real place, hear levelled narration, and answer questions in the target language. Speech recognition checks pronunciation when they speak. On the web app they can also tap or type.

Trips

Guided visits, 5-30 minutes in length. Experience culture, history, geography, festivals, food, everyday life and more. Students repeat keywords and answer short comprehension quizzes. Narration is levelled to CEFR and JLPT: beginner A1/A2 or N5; intermediate B1/B2 or N3; intermediate+/advanced B2+ or N2+. English versions with keywords are for absolute beginners or those just wanting to explore.

Conversations

Short encounters with real people, not avatars. Students practise speaking in a realistic scene: meeting someone, taking a taxi, talking about daily life. Live now in English (ESOL) and Spanish, and as part of the beginner Japanese course. French, German, Italian, Mandarin and Korean conversations are in production.

Lessons

Structured speaking and listening sequences. Live now: a 40-lesson beginner Japanese course, and a short beginner Spanish course. Useful as a supplement to existing teaching, or as a way to offer a language the department does not currently teach.

Access

The same experiences run on Meta Quest 2, 3, 3S and Pro, and in a browser on a laptop, Chromebook or tablet. Look around by turning in a headset, or by dragging and tilting on screen.

Free Demo

A free demo is available on the web and the Meta HMS, ArborXR, or ManageXR, with examples of each content type, in each language.

EXPERIENCES AT A GLANCE

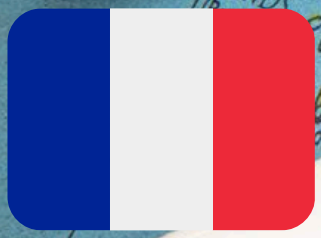

Levels based on Common European Framework of Reference (CEFR) and Japanese-Language Proficiency Test (JLPT). New content released regularly in all languages. See web app library for up-to-date catalogue.

5 Lessons (A1) with Conversations (A2-B1)
90+ Spanish Trips (A1-C2)
10 Themed Culture Trips (A2-B2)

20+ German Trips (A1-C2)
Conversations (A1-B1) and more Trips coming soon

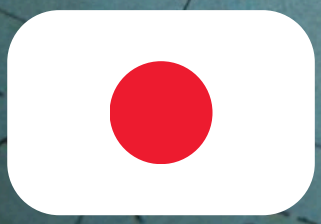

25+ French Trips (A1-C2)
Conversations (A1-B1) and more Trips coming soon

10+ Italian Trips (A1-C2)
Conversations (A1-B1) and more Trips coming soon

70+ English Trips (A1-C2)
15+ ESOL Conversation Practice (A1-B1)

40 Lessons with Conversations (N5)
25+ Trips Around Japan (N5-N3)
15-Part History Series (N3-N2)
10 Themed Culture Trips (N3)

Mandarin (filmed in Taiwan) and Korean coming soon!

SAME CONTENT, TWO WAYS TO ACCESS

Every Trip, Lesson and Conversation is on Quest headsets and in a browser. Whatever you have, Dynamic Languages boosts engagement in your classroom, but the experience does differ.

Headset

Offers the best immersion and inspires conversation. Students report back on where they went, who they spoke to, what they spotted that the others didn't. They will be excited to compare their experiences.

Web App

Great for independent work, cover lessons, or when the whole room is going to visit the same place at once. Students look around by dragging the picture on a laptop or tilting a tablet. They answer quizzes and questions by speaking, tapping or typing.

Combination

A few learners in headsets, everyone else on the web app, then a shared discussion. Over the course of a year, everyone gets a turn in the headset.

Your Tech

Language and culture immersion in VR headsets is incredible, but it is expensive to kit out a whole class with them and there are accessibility limitations. We have created the web app so students can benefit from the fantastic travel and speaking opportunities Dynamic Languages offers, using whatever combination of devices your school already has.

We sell software, not hardware. If you have no headsets, start with the web app. Resellers can help if you later want kit. If you have headsets and already use Meta Horizon Managed Services, ArborXR or ManageXR, our Quest app is available through those.

A 15-MINUTE BURST, OR A FULL LESSON

Experiences are short on purpose. Most range from 5 to 30 minutes, so you can use one to punctuate a lesson, or build a whole class around it, and deep-dive into a topic or spark a debate.

Short Activity

> Teacher chooses a short Trip or Conversation and sets a language goal, e.g. practise the key words or phrases, find the answer to one extra question.

> Students all experience the same thing in a headset or a browser.

> After, they create new sentences using the new words/phrases, and answer the extra question.

> Bonus task: What did they spot that the narrator did not mention?

Explorer, Researcher, Reporter

In groups or solo, students become investigators. They pick a place or festival, learn something about its history or culture, and tell classmates what they found. This could lead to a bigger project like writing a travel brochure, making a poster, or giving a presentation.

Cover Lesson or Independent Study

Students choose a destination from a short list, complete the Trip, then write or record a report for the class. Transcripts and audio files are available online, so work can continue after the headset comes off.

The Trip or Conversation sparks inspiration, and encourages a discussion about their shared experience. The language learning happens before and after the experience as well as during it.

Immersive videos are more tangible than normal videos. To have the most impact, reflection should follow each experience. Trips and Conversations should be combined with real-world activities to reinforce any new language, as well as discussions about what students have seen, heard, and learned.

Web App Study Page:

Each experience has a study page on the web app with transcripts, audio, English translations and grammar guidance. Use it to plan a lesson or set as homework. PDF and Word versions are available.

SPEAK WITH BELO

Belo is your AI conversation and travel buddy. After any Trip, Conversation or Lesson, students can talk it through out loud with Belo.

Belo Already Knows:

- which Trip, Conversation or Lesson the student just experienced
- the words and phrases they found hard to remember or pronounce
- the questions they answered and what they struggled with

With Belo, Students Can:

- recount what they saw and heard, expressing opinions and ideas
- practise the new language again in a short conversation
- go over mistakes and try to improve their pronunciation
- run through a Conversation or the Lesson's role play again
- ask simple questions about the culture or place they visited

Included Belo Minutes:

- Demo: 5 minutes
- Pilot: 500 minutes
- Headset licence: 500 minutes per headset a year
- Classroom licence: 300 minutes a year
- Extra mins: 1000 for £60 / $79 / €69 or 5000 for £250 / $329 / €289

Belo is available in the VR app and the web app. With a licence, teachers can see student conversations. Belo is optional. Full details of how voice and conversation data are processed (including that audio is sent to our AI provider) are set out in our Privacy Policy. The Privacy Policy is provided with every quote and invoice.

SPOTLIGHT DESTINATIONS: A TASTE OF WHAT'S AVAILABLE

Travel back to the days of the **Romans**, **Moors**, and **Visigoths**

Uncover the history of **Champagne** and learn how it is made

Discover **Black Forest** folktales and the region's clockmaking

Follow in the footsteps of the **Samurai** and learn about **wabi-sabi**

Learn about the **Industrial Revolution** and **Queen Elizabeth II**

Explore the **Alps** and discover the power of water and mountains

WHEN TEXTBOOKS ARE NOT ENOUGH

Teachers tend to reach for Dynamic Languages to solve one of three problems:

Students Will Not Speak

A conversation with a real person or our AI conversation buddy, answered by voice, is a lower-stakes option than performing in front of the class. Speech recognition checks pronunciation, so the teacher does not need to mark every utterance. Students build confidence.

Cultural Context is Falling Flat

Trips put landscapes, streets, monuments and festivals in front of the class. The language is experienced in the time and place it really happens, not on a worksheet or in a book.

Travel is Not Possible

Visit Seville during Feria, a Black Forest cuckoo clock shop, or a rice terrace in Japan. Useful when the exchange can't happen, budget is tight, a student cannot travel, or Year 9 needs a motivation boost.

This will not replace a teacher. It will not make a class fluent in a fortnight. It is a way to get listening, speaking and cultural or geographical context into a short, engaging activity.

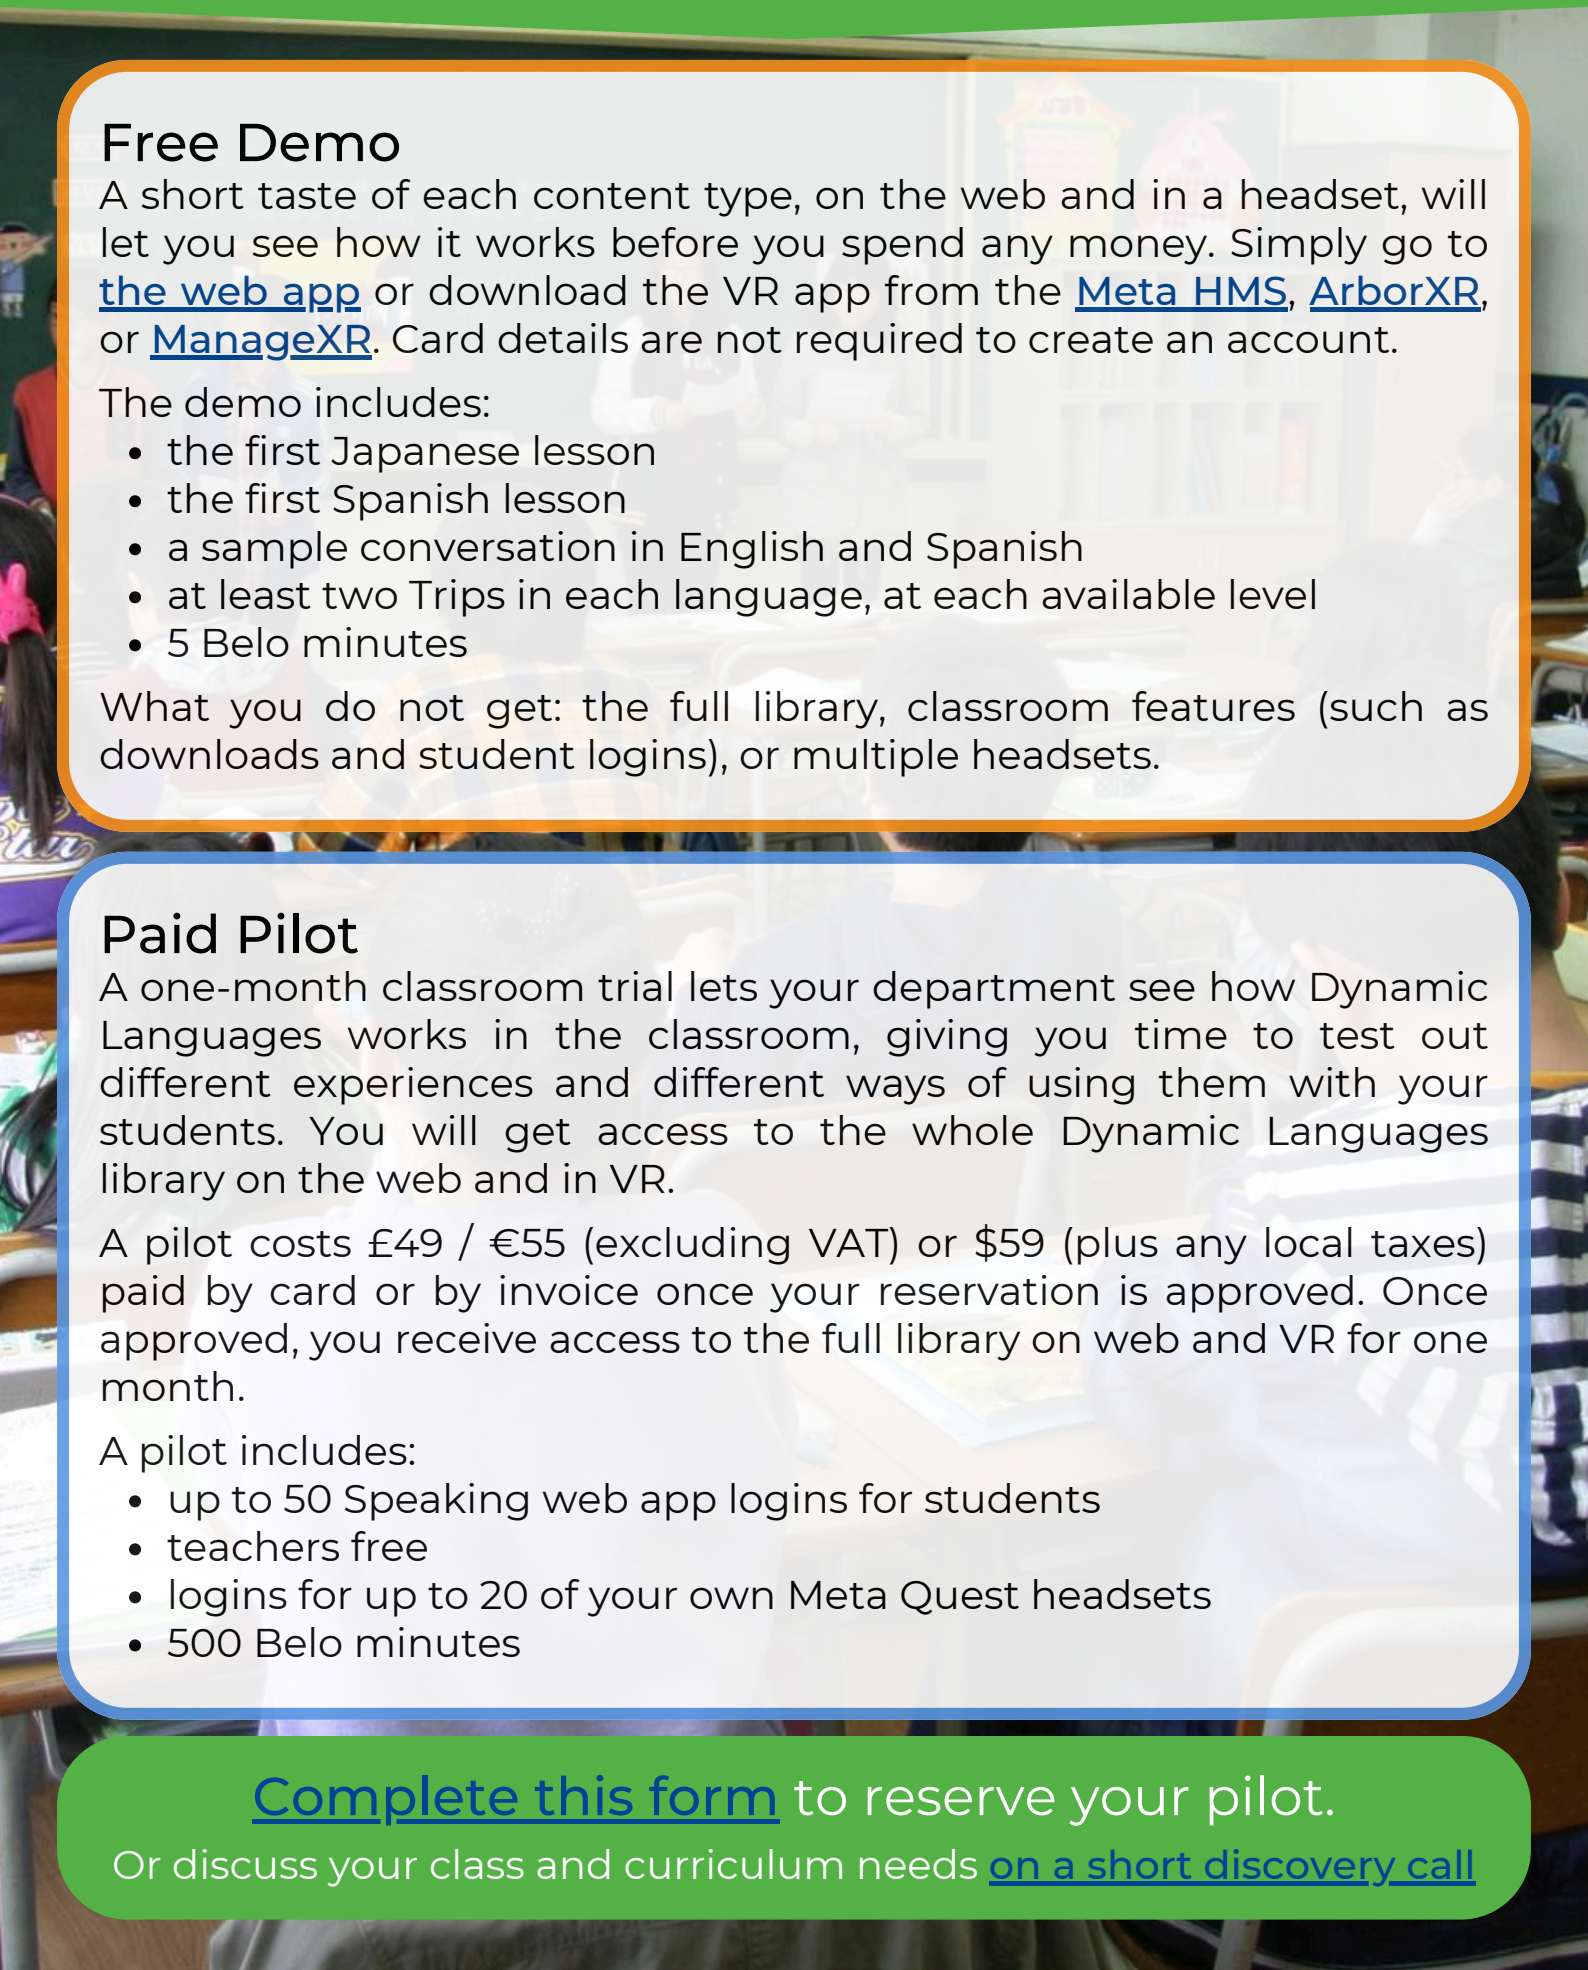

Real Use Case

A school in Arezzo, Italy, used the Spanish Trips to bridge the gap after students returned from their Erasmus semester. They reported stronger speaking after a short time, and students were inspired to share stories of experiences they had while on placement. Student and teacher feedback is in this short video.

TRY BEFORE YOU BUY – DEMO & PILOT

Try the demo if you want to have a look at the app this afternoon.
Set up a pilot if you want a class to use it for a few weeks before you commit.

Free Demo

A short taste of each content type, on the web and in a headset, will let you see how it works before you spend any money. Simply go to the web app or download the VR app from the Meta HMS, ArborXR, or ManageXR. Card details are not required to create an account.

The demo includes:

- the first Japanese lesson
- the first Spanish lesson
- a sample conversation in English and Spanish
- at least two Trips in each language, at each available level
- 5 Belo minutes

What you do not get: the full library, classroom features (such as downloads and student logins), or multiple headsets.

Paid Pilot

A one-month classroom trial lets your department see how Dynamic Languages works in the classroom, giving you time to test out different experiences and different ways of using them with your students. You will get access to the whole Dynamic Languages library on the web and in VR.

A pilot costs £49 / €55 (excluding VAT) or $59 (plus any local taxes) paid by card or by invoice once your reservation is approved. Once approved, you receive access to the full library on web and VR for one month.

A pilot includes:

- up to 50 Speaking web app logins for students
- teachers free
- logins for up to 20 of your own Meta Quest headsets
- 500 Belo minutes

Complete this form to reserve your pilot.

Or discuss your class and curriculum needs on a short discovery call

LICENCES AND PRICING

Simple, flexible pricing: buy any of these on its own or together

VR Headset Licences: £199 / $249 / €229

per headset per year (+ VAT or local taxes)

One licence per headset, used by as many students as you like.

- VR app, headset management, downloads
- 500 Belo minutes per headset a year
- 5+ headsets: 30 Speaking web app logins included
- 20+ headsets: 60 Speaking web app logins + 2000 extra Belo minutes

Web App Student Logins: Web app only, not VR

Each student's own login on a browser. There are two types:

Quiz: £5 / $6 / €6

Quizzes answered by tapping or typing; no microphone

Speaking: £19 / $24 / €22

Quiz plus spoken answers, pronunciation analysis and Belo access

per student per year (+ VAT or local taxes). Belo minutes purchased separately

Classroom Licence: £999 / $1299 / €1149

per year (+ VAT or local taxes)

For viewing on the classroom screen

- The whole library on the web
- All staff free
- 30 Speaking web app logins
- 1 VR headset licence
- 300 Belo minutes

Minimum order £500 / $650 / €575 | Pay by invoice or card
Without a classroom licence: 1 free staff login per headset or per 30 student logins
Extra Belo minutes: 1000 for £60 / $79 / €69 or 5000 for £250 / $329 / €289 + VAT or local taxes
3-year terms or groups of 3+ schools: 10% off each

BRITAIN IN 360°

Virtual field trips narrated in regional accents, and conversations with real people

Visit some of the most iconic **football stadiums** in the world and dance at the famous **Notting Hill Carnival**. Uncover ancient mysteries at **Stonehenge**, and hunt for ghosts in Europe's **most haunted city**. Discover grand **cathedrals** in cities including Canterbury, York, Cardiff and London. Learn about the **Industrial Revolution** while exploring Manchester and Liverpool.

Meet Real People

Learn about their favourite places and daily lives. Tell them about yourself and practise having natural conversations. Prepare for real-life situations like taking a taxi or having a cup of tea with a new friend.

Practise speaking without the pressure. Real people, realistic scenarios, speech recognition for pronunciation, and a safe space to build confidence.

Feel the emotions and nerves of real life conversations in low-stakes environments. Immersive videos and speaking with Belo offers a safe space to improve communication skills, while staying calm and present.

TRAVEL AND EXPLORE CITIES & NATURE IN FRENCH, GERMAN, AND ITALIAN

New content in each language is added regularly

German-language Trips exploring the culture, history and landscapes of many places, including the Black Forest, with Trips about the history of Cuckoo Clocks and local folklore.

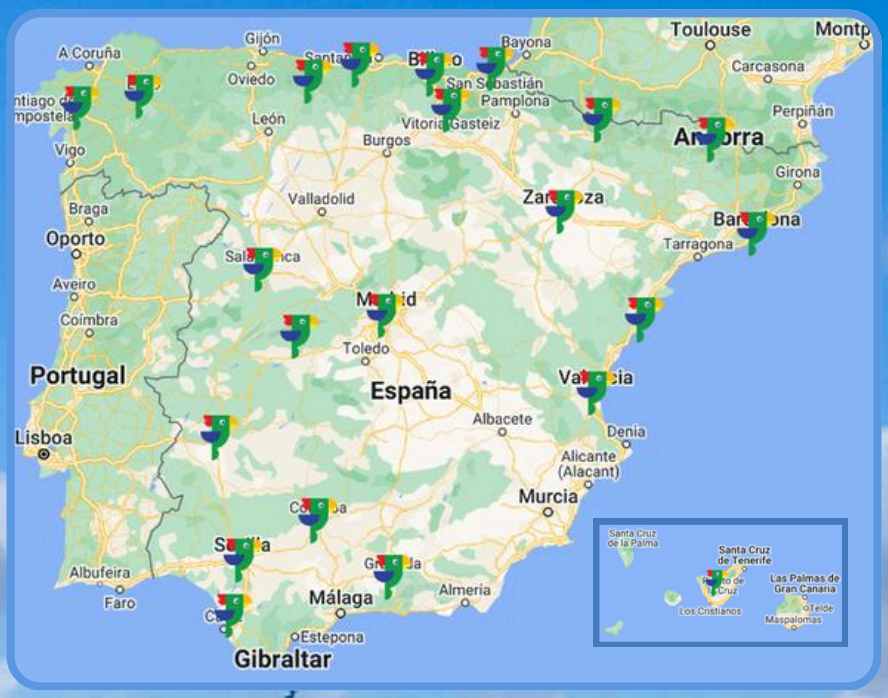

Guided adventures in French to learn about the unique aspects of different regions, including the French Riviera, Champagne, and the UNESCO Causses & Cévennes region.

Trips in Italian exploring the history and scenery of Tuscany and some of the country's most iconic landmarks, with a multi-part exploration of Florence, from its founding, to the powerful Medici, and current tourism boom.

SPANISH TRIPS, LESSONS AND CONVERSATIONS

Five beginner lessons that take you from zero Spanish to having your first conversations with native speakers.

Travel back to the days of **Romans, Visigoths, Moors**, and the Iberian Peninsula's **prehistoric** inhabitants. Soak up the atmosphere at the festivals of **Las Fallas, Carnaval de Cádiz, Los Escobazos, La Feria de Abril, La Tamborrada** and **Los Moros y Cristianos**. Delve into Spanish culture with a closer look at topics such as: *mercados y comida*, *organización social, el Camino de Santiago, el medio-ambiente* and *ingenio humano*.

Las Fallas Festival

Real Conversations

with native speakers that **reduce foreign language anxiety** through speaking in simulated encounters. Speech recognition helps improve pronunciation.

BEGINNER JAPANESE COURSE

40 comprehensive lessons, giving students a solid foundation in speaking and listening skills. This includes real-world conversations and scenarios, supported by speech recognition to boost confidence from day one. Ideal to supplement ongoing lessons, or as an additional offering in a language centre where Japanese is not currently taught.

Complete immersion in a Japanese learning environment where only Japanese is spoken. Lessons take students from zero Japanese to having confident conversations. 360 3D live-action video of classroom lessons, which include roleplays, songs, and games that focus on verbal communication skills.

Conversations with Native Speakers

Eye contact, body language, and facial expressions create memorable encounters. Practise what is taught in the lessons, with speech recognition to improve pronunciation and reduce foreign language anxiety.

JAPAN IN 360°

15 Trips taking students through the country's history, 10 Trips focused on specific cultural aspects, and a growing catalogue of Trips exploring the country

Discover the history and culture of Japan while exploring 360 3D scenes from around the country. Highlights include: Kofun burial mounds, Samurai, Kawaii culture, cherry blossom, agriculture, Golden Week, traditional Japanese aesthetics, forest bathing, onsen culture, and much more.

All Trips are available in two languages at multiple levels:

- Japanese at N5 to N3 level with quiz questions and Japanese keywords
- Advanced English (C2) with Japanese keywords (optional)

Cherry Blossom Festival

Witness erupting volcanoes, festivals, oceans, mountains, forests, and cities, all across this unique and captivating country. Ideal to support geography lessons, as well as Japanese language courses.
